at least one defined sound target spaced from each of the speakers of the multiplicity of speakers, wherein each speaker has a means for applying a time varying audio drive voltage which is substantially

The Boss Audio BRT34A Loudspeaker has at least one defined sound target spaced from each of the speakers of the multiplicity of speakers. Each speaker has a means for applying a time varying audio drive voltage which is substantially identical, except that each audio drive voltage is offset in time by an amount which is related to the distance between each speaker and the defined sound target. So that substantially identical sound from each speaker reaches the sound target at the same time.

For example, each of the Boss Audio BRT34A Loudspeaker speakers is connected to an audio amplifier. An audio signal is provided to each speaker via the speaker's respective amplifier. The audio signal is delayed more for speakers closer to the position at which the acoustic beam is aimed and delayed less for speakers farther from that position.

identical, except that each audio drive voltage is offset in time by an amount which is related to the distance between each speaker and the defined sound target, so that substantially identical sound from each speaker reaches the sound target at the same time; and

- IPX5 Rated 3" Full Range Speakers, Four Pairs
- Weatherproof IPX 5 Rated 1" Horn Loaded Tweeters, One Pair
- 700 Watts Max Built-in Class D Amp and 3.5mm Aux Input Compatible with Audio Output of Smartphones and MP3 Players
- Bluetooth Audio Streaming - play and control music and apps like Spotify/Pandora wirelessly
- IPX 5 Rated Weatherproof Enclosure, Built-in LED Lights with Wireless Remote
- Built-in DSP, Pre Amp outputs allow you to connect multiple Systems together and Preset EQ
- Multi-Angle Adjustable Clamps fit bars from 1.75" to 2". Great for ATV's or UTV's!
